

# GRAND OPENING MIAMI BEACH SOUNDSCAPE / LINCOLN PARK

24-01-2011

In 2009 West 8's winning design for Lincoln Park was unanimously chosen by the Miami Beach Commission. The park is part of the New World Symphony Campus, which includes a concert hall and a conservatory.

Lincoln Park is a new meeting place in town. Centrally located in the Art District at the monumental terminus of lively Lincoln Road, the park has multiple functions. During the day the park is shaded by pergolas and palm trees. In the evening it is a cultural hotspot, one of the special attractions of the park being a video and sound installation - projecting concerts and video art on building's 700m<sup>2</sup> wall, which serves as an outdoor screen for the park. The park is an urban garden that expresses the euphoria of Miami, and will be actively programmed for public and cultural events.
