

PRESENTATION OF PRELIMINARY DESIGN PLAYA DE PALMA

08-06-2009

The preliminary design of the master plan for the new Playa de Palma, West 8 designed for Consorcio Platja de Palma, was recently presented to the public. In anticipation of the final master plan design, to be presented in February 2010, residents, entrepreneurs and others who are interested can already get an idea of the promising new plans for the area.

In 2008 West 8 won the competition for the transformation of 1450 hectares of Playa de Palma tourist area and subsequently designed the preliminary master plan with diversity as a basic principle. The major tourist hub will be reconnected to the incredible beauty of the islands landscape and encourages tourists to venture beyond the beach.
