

WEST 8 WINS COMPETITION VAARTKOM LEUVEN

02-03-2010

West 8 in collaboration with Snoeck en Partners, Bas Dirk Jaspaert, ERM and Tritel, has won the competition organized by the City of Leuven, for the revitalization of the former industrial site Vaartkom in Leuven, Belgium.

The Vaartkom is a unique location close to the water's edge and within walking distance from the historical city center. Already this district offers an exceptional urban landscape, with its remnants of a rich industrial past. Inspired by these industrial artefacts, West 8 proposes a vibrant new urban center where living, working and production function in a healthy balance.
